***Abstract*—This is an minimum technical memo containing the usual elements of technical writing: figure, table, equation, citation, bibliography, code snippet, and appendix. The document is rendered to PDF by Quarto with a custom extension which provides several styles. A memo style (inspired from Tufte handout style) for brief report, a 2-column paper style for scientific article, and a A3 poster style. The PDF is rendered with the modern Typst engine, which is built into Quarto.**

***Index Terms*—Quarto, technical writing, memo, paper, poster.**

I. Overview

A. Minimum example

[In 1-column memo, margin notes are supported, including small **inline** image.]

This minimum example contains all standard elements of a technical writing to illustrate the formatting styles provided by the quarto-tech-memo extension. Let's start with some math: $e^{\pi i} + 1 = 0$ is an inline equation, Eq. Equation 1 is a numbered equation. Here is some physical quantities using unicode: $B_{\text{noise}} = 15\ \mu\text{T}/\sqrt{\text{Hz}}$. Note the "Narrow No-Break Space (NNBSP)" unicode `202F`.

$$\nabla \times \mathbf{B} = \mu_0 \mathbf{J} + \mu_0 \varepsilon_0 \frac{\partial \mathbf{E}}{\partial t} \tag{1}$$

B. Figures and tables

Citations are included in IEEE style such as [1]. Figure 1 shows a numbered figure. Table I is a numbered table.

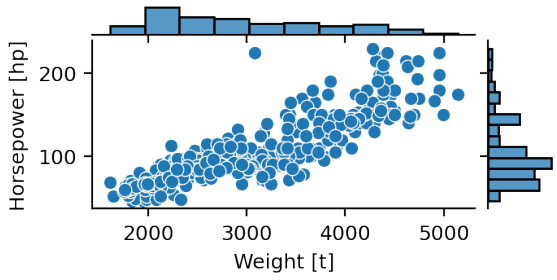

Figure 1: Figure caption.

Table I: Example of engineering table

Parameter	Symbol	Typ	Unit
Hall sensitivity	S_H	0.2	V/T
Effective nr. of bits	ENOB	12	-

C. Code snippet and callouts

*The header **might** expand into the second line*

A title spanning two lines is often used in slide decks to formulate a proper full claim.

Syntax highlighting is supported in code snippet too. Callout boxes are available with appropriate icons or colors.

```python
def f(x, square=True):
    # Python code snippet
    return (x**2) if square else x
```

> **Markdown syntax**
>
> The manuscript is written in Markdown, a plain-text **easy syntax**.

D. Dummy section

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Donec semper leo nec quam aliquam consectetur.
